

It's More Than Form And Function.
It Goes *Beyond The Edge Of Knives*.
It's Personal.
It's Benchmade.

FORM & FUNCTION The standard in single-handed functioning. Benchmade Knife Company engineers and manufactures a diversity of folders featuring several unique locking mechanisms, including our own exclusive patented **AXISnted**

DISTINCTION

Overbuilt? Maybe. But at Benchmade we do things our own way. We are involved in the design and manufacturing of each component in every knife we make from start to finish. Benchmade has close associations with several of the world's premiere custom knife makers who provide some of the latest innovations and

functional designs. A dedicated

work force utilizes the newest

technologies available

including laser cutting to tol-

erances of .0005-inches

which equates to slicing a human hair into 16 layers. From

there, the CNC machin-

ters and a host of other advanced production equipment helps to shape each piece into a "Benchmade fit" cutting tool. Our components are precisely manufactured to assemble with tight tolerances without requiring any additional fit and finish work to mask any inaccuracies. It all comes together in a higher standard of fit, form and function—unparalleled, even by some custom knife makers' standards.

GRIPTILIAN SERIES The unmatched function of AXIS combined with the simplicity of a molded handle design— **get a grip!** It's a new species of knife. Safe. Reliable. Smooth. Affordable. Grip in two blade styles and two knife sizes. Griptilian performance is keenly unleashed with a simple thumb rotation, either right or left handed, you choose. The hand settles naturally over the palm swelled shape and its textured skin. So don't hold back, go wild and — *GET A GRIP!* Grrrrr!
