2017 CATALOG

BENCHMADE KNIFE COMPANY 2017 CATALOG

30
ANNIVERSARY

30 YEARS AND COUNTING.

December 1987.

Inside a small shop in Los Angeles, California, something big was happening. A young man was on a personal mission. A hunt for perfection.

Equipped with manufacturing skills from his high school shop class, childhood memories from the Filipino community, and grit, Les de Asis created one of the world's great tools. A seemingly impossible balance of artistry, science and craftsmanship: the Benchmade Bali-Song®.

It was the knife that started it all.

From the humble garage beginnings to today's state-of-the-art Benchmade factory in Oregon City, Oregon—the hunt for the perfect knife continues. Stronger than ever.

Benchmade takes immense pride in seamlessly blending old-world craftsmanship with advanced manufacturing technologies and ongoing material science research to produce a vast array of limit-pushing, genre-bending, precision-crafted knives. Honoring tradition while looking to the future.

The first 30 years have been a fantastic grind.

Here's to 30 more.

HOW TO CHOOSE YOUR BENCHMADE KNIFE

1 ACTIVITY

Outdoor, tactical, every day use—there are many uses for a knife, and some knives are better for certain activities than others.

HOW WILL YOU USE YOUR KNIFE?

TACTICAL Designed for hard, immediate use, these high-strength knives feature robust mechanisms for situations where performance is a must.

RESCUE For critical situations. Gloved hands and the need to cut pliable materials are considerations in the design of these knives.

EVERY DAY Not obtrusive or uncomfortable in slacks or shorts; just convenient and well fitted to your general needs.

OUTDOOR From water to woods, backpacking trips to car camping, kayaking to fly-fishing, these versatile cutting tools can be used for many tasks.

HUNTING Knives are a critical component of a successful hunt. These are the most advanced hunting knives ever made.

SURVIVAL Things can happen unexpectedly for any adventurer. These knives have been built for the unexpected.

KEY KNIFE FEATURES

AXIS® Exclusive to Benchmade, the AXIS® lock is truly ambidextrous and extremely strong.

Dual-Action Works both as an auto and manual-opening mechanism.

Ambidextrous Can be used equally well with either hand.

Reversible Clip The pocket clip can be removed and placed in alternate locations on the handle.

MOLLE® Compatible A versatile attachment system designed for kitting military equipment.

LifeSharp: Service and Warranty Our industry-leading lifetime warranty and product service program. For more detailed information, visit pages 89 and 96.

2 MECHANISM

We offer five primary actions: manual-opening, assisted-opening, automatic-opening, fixed blade and Bali-Song®. If you're a mountain climber, you may want an assist. If you're a sportsman, a fixed blade may be the right choice. Whatever the case, consider which mechanism type is optimal for your needs. Mechanisms like the AXIS® lock deliver manual opening, assisted opening and automatic opening. Others, like the monolock, deliver only manual opening. For detailed information on our mechanisms, visit page 91.

ACTIONS

Manual-opening "Manuals" must be opened 100%, from the closed position to the open position, by the user.

Assisted-opening "Assists" have a spring that encourages the blade into the open position once the user pushes the blade manually beyond a certain point.

Automatic-opening "Autos" have a button or other actuation switch that mechanically

fires the blade open without the user directly manipulating the blade.

Bali-Song® "Balis" or "butterfly knives" open and close by way of two handles that rotate around the front and back of the blade.

Fixed Blade These knives are permanently open and almost always come with a sheath to protect the edge.

3 BLADE STYLE

While the cutting edge does the work, the edge is applied to the cutting surface in different ways depending on the shape of the blade. Blade shapes with larger radiuses may be optimal for hunting while blade shapes with hard angles, like the tanto, may be better for tactical applications.

SHAPES

Clip-point Blade contains a sharp beak, typically forward of the mid-point, as if the tip has been “clipped off”.

Drop-point Drops off the spine to the top. Tip height is typically below the center line on the blade.

Tanto This shape is easily identified by the angular lines. The knife edge is flat and transitions with a hard break in the angle from the tip to the primary edge.

Reverse Tanto Defined by the bevel creating an upside-down tanto profile, adding weight forward on the blade.

Sheepsfoot The spine of the blade ‘rolls’ into the tip, creating a more rounded end to discourage puncturing.

Wharncliffe Similar in shape to the sheepsfoot with a spine that ‘rolls’ into the tip earlier. This blade has a completely straight edge.

Spear-point Must be symmetrical considering the blade profile. *Traditionally, spear-points are double-sided, but those knives are more specifically referred to as daggers.

Weehawk Characterized by a sweeping edge and spine radius that tapers to the tip and handle.

CONFIGURATION CODES (INSIDE THE MODEL NUMBERS)

BLADE VARIATIONS

- None** No coating, no serrations
- S** Serrations, no coating
- BK** Black coating, no serrations
- SBK** Serrations and black coating

HANDLE

- ORG** Orange
- OD** Olive Drab
- SN** Sand
- PNK** Pink
- YEL** Yellow
- BLU** Blue
- *-1, -2, etc. typically indicate handle material variations

4 BLADE STEEL

Steel composition can mean the difference between one sharp cut and 1,000. There are many types of steel and additional factors that play into the right kind of steel for your usage. For instance, the way some steels are heat treated plays a critical role in a knife’s performance.

PROPERTIES

Edge Retention

How long a blade can maintain its sharpened edge.

Strength

Maximum stress withstood before a blade breaks or fails.

Corrosion Resistance

Resistance of a blade to oxidization and chemical attack.

Toughness

Resistance of a blade to fracture and chipping.

For more detailed information, visit page 92 or go to benchmade.com.

GOLD CLASS

PAGES 4-7

Fit for a collector's case, yet purpose-built. An exquisite work of art crafted from the hard-working bones of the world's most reliable knives. This flawless creation isn't just for the safe; it is built to perform at the highest level.

BLUE CLASS

PAGES 8-35

The core. The workhorse. The 'EDC'. High-quality blades, effortless function and near-perfect performance. The heart and soul of our 30 years of existence. Precise form meets every day carry function, right in your pocket.

HUNT.™

PAGES 36-45

Hunts are defined by great adventures and by single moments. That's why we put endless hours of R&D, mountains of field research and the highest quality materials into our hunting knives. So you can feel confident when your moment comes.

BLACK CLASS

PAGES 46-77

It's not every day that a knife is called to action. Sometimes it may be weeks, months; some knives may never be used for their intended purpose. In some arenas, a knife is called upon only in the worst of times. And when the time arrives, performance is everything.

DON'T TREAT THIS KNIFE SPECIAL.

This is the custom knife-maker's knife. Artisan craftsmanship taken to another level. We seamlessly blend old world techniques with modern technology, and pay extra attention to these few special blades. With exquisite details from pommel to point, it's a knife you'll want to keep in pristine condition, in your collector's case. But that'd be a shame. This knife is built to perform.

OUR FIRST-BORN TURNS 30.

For many years the butterfly knife was known as a cheaply made self-defense weapon. Quality and precision were an afterthought. That was until Les de Asis set out to create one.

With Les' influence, better materials and painstaking attention to detail, the Benchmade Bali-Song® was born. And it will go down in history as one of the greatest knives we've ever made.

30 years later, the Benchmade Bali-Song is still universally respected in knife-maker and collector circles.

Bali-Song will always have a special place in our hearts and hands. And will always be Benchmade.

YOU DON'T KNOW A GOOD KNIFE UNTIL YOU NEED A GOOD KNIFE.

Preparation, pain, grit, frustration, excitement, anxiety and the overwhelming sense of accomplishment when you arrive at your quarry, knowing you are self-reliant and fully understand the meaning of the word “meat.” And when the celebration turns to work for the last time, a great knife can't pack meat, but it sure makes it easier to get.

15007 SADDLE MOUNTAIN HUNTER

BENCHMADE DESIGN • U.S.A.

-------------	-------	-------

YOU'LL NEVER SEE PERFECTION.

If something works perfectly...it just works, perfectly. Perfection is invisible. Perfection works in secret. Perfection is automatic.

It's an extension of your instincts. It allows you to operate without another thought about it, even when lives are on the line.

Perfection has no ego. Perfection doesn't need a pat on the back. Perfection is perfectly happy not existing.

It's been an honor to provide automatic, flawless performance—the closest to perfection that we've created so far. So you can do your job.

No, you'll never see perfection. But that's the way we like it.

Here's to another 10 years of equipping the invisible.

INFIDEL® FAMILY
MCHENRY & WILLIAMS DESIGN • U.S.A.

SHEATHS

Folder Pouch (MOLLE® Compatible)

These snap-over hood closure pouches secure the knife well and can be used for belt carry with the MALICE CLIP® (included), and are MOLLE® system enabled too. Heavy stitch and elasticized true fit. Made in USA.

- MOLLE® Folder Pouch.....\$25.00
 A. 984818F - Black for models 3300, 3320 and 9051/9052
 B. 984094F - Black for models 5000, 915/916 and 9170
 C. 984093F - Coyote for models 5000, 915/916 and 9170

140/141 Fixed Sheath (MOLLE® Compatible)

Sheaths come standard with MALICE CLIP® and Velcro® adjustable belt hanger for belt carry. Heavy stitch and hard liners stow the knife securely and a snap-around closure secures the handle. Made in USA.

- MOLLE® Fixed Soft Sheath.....\$50.00
 D. 983468F - Black
 E. 983469F - Coyote

Tek-Lok™

Multiple position options with compatible sheath.

- F. 981609F - Tek-Lok™, large size.....\$15.00

MALICE CLIPS®

Injection-molded connecting clip to attach sheaths to MOLLE® systems, or to use as a belt loop-style carry. Clips securely closed with a snap-lock.

- G. 983551F - Large MALICE CLIP® (4.75" size).....\$2.00
 H. 983550F - Small MALICE CLIP® (3" size).....\$1.50

5 Hook/7 Hook/8 Hook Pouch (MOLLE® Compatible)

These Velcro® hood closure pouches secure the Rescue Hook for belt carry, and are MOLLE® system enabled with the MALICE CLIP® (sold separately). Made in USA.

- MOLLE® 5 Hook Pouch.....\$8.00
 I. 981494F - Black
 J. 983856F - Foliage Green

- MOLLE® 7 Hook Pouch.....\$10.00

- K. 984166F - Black
 L. 984205F - Foliage Green
 M. 984204F - Coyote

- MOLLE® 8 Hook Pouch.....\$12.00

- N. 985398F - Black
 O. 985570F - Foliage Green
 P. 985569F - Coyote

Soft Sheaths

All soft sheaths are 1680-denier poly-ballistic nylon with liners and Velcro® closures. Made in USA.

- Q. 981086F - Soft Sheath, small (1.625" W x 5" D), black\$10.00
 981087F - Soft Sheath, large (2" W x 5.25" D), black\$10.00
 981717F - Soft Sheath, 4" Bali-Song® Series, black\$10.00

SPECIAL SERVICES

LIFESHARP SERVICE

We will gladly resharpen your Benchmade knife to a factory razor sharp edge (service does not apply to any serrated portion of the blade). Simply ship your knife to us. We will inspect the knife for any warranted repairs and “tune” the knife for optimum performance. Ship the knife to Benchmade, postage-paid and insured. Please enclose your return shipping address.
www.benchmade.com/lifesharp

PERSONALIZED LASER MARKING

Make any Benchmade your Benchmade. Commemorate an event or outfit the unit. Whatever the occasion, now you can have your logo or artwork laser-etched onto any Benchmade. Depending on the particular model, the mark can be placed on the blade or, for some models, on the handle. If you're interested in this special service, simply call a Benchmade customer service representative at 800.800.7427 or visit www.benchmade.com/lasermark.

COMMITTED TO EXCELLENCE

For over 30 years, Benchmade has been designing and manufacturing world-class products for world-class customers.

When Benchmade was founded, the mission was to create something better; something exceptional. Today, we continue to innovate with the goal of taking performance and reliability to the next level. To exceed what is expected.

Whether you're using a Griptilian® for every day duties or taking the fight to the enemy with the Infidel®, our knives are built to perform. When you choose to purchase a Benchmade, you do so because you want the best. You demand it. And programs like our LifeSharp Lifetime Service and Warranty are the foundation of our commitment to excellence.

DESIGNER COLLABORATION

Benchmade believes working with custom designers creates the most innovative and functional designs in the industry. These skilled artisans and craftsmen pour their passion into their work and agonize over every detail. By collaborating with a selection of world-class custom designers, we're able to tap into the newest locking mechanisms, modern materials, and custom blending and finishing techniques.

Mel Pardue The most senior design team member, Mel has been grinding sparks, making knives and creating a following for 25-plus years. His style has a class and simplicity all its own. The Pardue collaborations offer great utility to the every day knife user while at the same time presenting an upscale distinction. Less is definitely more with Mel's designs.

McHenry & Williams

Bill McHenry & Jason Williams It runs in the family... Bill and son-in-law Jason spend their days making exquisite pieces of "art with an edge on it." Their dedication and talents complement one another very well and have led to several noteworthy innovations in the knife-making world. Benchmade was fortunate to be involved with one such innovation, the AXIS® mechanism. The rest is history in the making.

Warren Osborne Being raised in the farming and ranching industry taught Warren early on what great utility a quality knife can offer. How a knife feels in the hand over extended use, blade design/edge configurations, and the types of materials used are all mandatory considerations of an Osborne design.

Seiichi Nakamura Engineering was his life's work until he retired to focus his efforts on a passion for custom knife work. He specializes in small Japanese-style folders, gentleman's carry and jewelry knives. His eye for artistry and mechanical engineering make him a perfect fit for the innovative Benchmade team.

Shane Sibert Since 1994, Shane Sibert's goal has been to design and create unique knives that evoke pride of ownership while at the same time perform tasks and challenges with exceptional ease. A lifelong avid backpacker, Shane draws inspiration from hiking throughout the Pacific Northwest's vast wilderness. He's an occasional practitioner of martial arts and enjoys scuba diving in Oregon's chilly waters.

Ken Steigerwalt In 1978, at the age of 15, Ken found himself at the kitchen table with some files and a vise. Three years later he decided that knife-making was going to be his full-time career. Since then, Ken has dedicated himself to wowing the industry with his innovative style. He describes his work as a passion and a journey to build a better knife than the last. Benchmade has been fortunate to be involved with one of his innovations, the Nitrous® Assist mechanism.

LERCH

Matthew Lerch Co-developer of the Nitrous® Assist mechanism, Matthew has his finger on the pulse of industry-leading innovations.

Bob Lum Growing up in the Pacific Northwest with a passion for Eastern cultures gave him an opportunity to develop an appreciation for the importance of a fine knife, which comes through in his elegant and utilitarian designs. Thanks, Bob.

Greg Thompson Greg used an extensive background in mixed martial arts to create the Special Operations Combatives Program (SOCP), a designated program for U.S. Army Special Operations Forces. With over 15 years of experience training Special Operations soldiers, Greg currently works as the Director of Training for the XVIII Airborne Corps at Fort Bragg, NC.

Butch Ball Butch developed a passion for knives at a very early age. After building a few fixed blades in the early '90s, he decided in 2000 to begin a true custom shop. Butch starts each knife as a prototype, which he then tests, re-creates and tests again. At each stage in this development process, he is thinking of ways to improve the design, whether mechanically or ergonomically. The results of this process are designs that are as robust as they are innovative.

LOCKING MECHANISMS

It seems simple enough: you open the knife, you close the knife. But it's the mechanics of motion that happen in the process of opening and closing that can make the difference between ordinary and extraordinary. Is the knife easy to actuate, can it be opened with one hand, is it ambidextrous, and will it be reliable when you need it most? These are all essential considerations when it comes to knife mechanics.

AXIS®

A patented Benchmade exclusive, AXIS® has been turning heads and winning fans ever since its introduction. A 100 percent ambidextrous design, AXIS® gets its function from a small, hardened steel bar that rides forward and back in a slot machined into both steel liners. The bar extends to both sides of the knife, spans the liners and is positioned over the rear of the blade. It engages a ramped tang portion of the knife blade when it is opened. Two omega-style springs, one on each liner, give the locking bar its inertia to engage the knife tang. As a result, the tang is wedged solidly between a sizable stop pin and the AXIS® bar itself. Available in manual, AXIS® Assist or Auto AXIS® configurations.

AXIS® ASSIST

Easily opened, quickly and with one hand, this evolution of the AXIS® includes a spring that helps fire the blade into the open position once the user pushes it beyond a certain point manually. The AXIS® lock also has the added benefit of "suck-back," which encourages the blade to stay in the closed position. AXIS® Assist knives also feature integrated safety lock systems.

LINER LOCK

The basic principle is an integral locking bar, resulting from the knife liner being stress-bent, enabling it to spring into position behind the rear tang of the blade when the blade is opened. The locking bar wedges against the rear of the blade, locking it open until you physically push it clear and close the blade (locking-liners are made either right- or left-hand-specific). And with a modified locking-liner you get a patented feature that helps enhance the lock function. The function success and function failure of a locking-liner depends greatly on how well it is made, and also the quality of the materials used. With Benchmade, you get the best of both.

MONOLOCK

The monolock mechanism is basically a locking-liner on steroids. The knife liner is one and the same as the knife handle, and thus the handle is designed and made to function as the locking mechanism. Subsequently, a thicker material is used to provide enough surface area to be a functional handle and in turn creates a larger surface area to lock the blade with. If executed properly, the monolock design rates very highly in strength and function.

NAK-LOK®

Built from the framework of the locking-liner with some innovative updates. The lock engages using tensile strength, compared to the compression hold of more traditional locking-liners. With the Nak-Lok®, the possibility of personal injury is greatly reduced, with the opening finger never crossing the blade's path.

NITROUS®

Another patented Benchmade exclusive, the Nitrous® boosts the blade with ease. As the blade is closed, the two torsion arms that run the length of the handle liners are secured in place and make contact with the blade tang. When opening, the user rotates

the blade open to a 30-degree angle, where the torsion arms take over and continue the blade-opening process on their own. The huge advantage of the Nitrous® design over other similar concepts is that the blade must be rotated open to beyond a 30-degree angle, which offers added user control.

BALI-SONG®

As much an art form as it is the ultimate example of form following function. The Bali-Song®, or butterfly knife, is of Filipino ancestry, dating back to nearly AD 800. Its basic form consists of a pin-hinged, two-piece handle which, when closed, encases the blade for carry. Opening and closing can be accomplished with a single hand, making the tool that much more utility-capable.

AUTOMATICS

Sometimes restricted to Active-Duty Military, Law Enforcement and Public Safety, these automatic knives utilize either push-button, slide-release or dual-action mechanisms. Benchmade autos take full advantage of powerful springs coupled with our precisely machined lock mechanisms, providing the most reliable automatic systems available in the industry. Our patented integrated safety mechanism, located on the handle spine in all push-button automatics, can also ensure that the blade will not inadvertently deploy, or close once it is locked open.

AXIS® AUTOMATIC

Auto AXIS® — strong, reliable, fast and an AXIS® lock through and through, this locking mechanism fires the blade open 100% mechanically when the AXIS® bar is pulled downward. Auto AXIS® also features integrated safety mechanisms and the added safety of "suck-back."

AXIS® DUAL-ACTION AUTOMATIC

Dual-action knives come in multiple forms, but only one group features the strength and ambidextrous versatility of the AXIS® lock. The AXIS® Dual Action automatic mechanism allows the user to open the knife like a regular AXIS®, but there's a secret: pull the AXIS® bar farther down in its stroke and a spring takes over and fires the blade automatically.

PUSH-BUTTON AUTOMATIC

Push the button and the blade fires into the open position. Our push-button mechanisms are not only fast and convenient, they're also extremely strong. Most also feature integrated safety mechanisms.

AMBIDEXTROUS PUSH-BUTTON AUTOMATIC

While push-button automatics have traditionally been single-sided, Benchmade also has pioneered the first-ever ambidextrous push-button autos that feature push-buttons on both sides.

OUT-THE-FRONT (OTF) AUTOMATIC

Our OTF mechanisms are mechanical masterpieces. Slide the lock button towards the top and the blade fires straight out. Pull the button back to the bottom and the blade returns into the handle.

BLADE STEELS

Benchmade uses a variety of modern materials selected for their superior performance characteristics. We strongly believe that if you're going to put this much effort into designing a premium-quality performance cutting tool, then it only makes sense to build it with premium-materials.

KEY

E Edge Retention

S Strength

C Corrosion Resistance

T Toughness

How long a blade can maintain its sharpened edge

Maximum stress withstood before a blade breaks or fails

Resistance of a blade to oxidization and chemical attack

Resistance of a blade to fracture and chipping

STEELS

CPM-S30V HRC: 58-60

A premium steel created especially for knives, it is a powder steel creating uniform carbide distribution and clean steel properties. As a blade material it offers excellent corrosion resistance and superb edge qualities. This stainless steel is extremely well balanced, making it one of the best all-around choices for daily tasks.

CPM-M4 HRC: 62-64

A powder-metal, non-stainless, special purpose high-speed steel with a combination of high carbon, moly, vanadium and tungsten for excellent wear resistance and toughness. Due to its lower level of chrome content it may require additional care to avoid corrosion.

CPM-20CV HRC: 59-61

Excellent edge retention and great corrosion resistance are typically hard to find in one steel, however, they meet here in CPM-20CV. A powder metal steel that takes a fine edge and maintains it, 20CV is a great choice for someone looking for low maintenance and superior cutting performance.

CPM-S90V HRC: 59-61

A true super steel, S90V offers substantial improvements in corrosion resistance over 440C and wear resistance far beyond that of D2. Extremely high carbon and vanadium content gives this premium stainless powder-metal alloy the ultimate in edge retention while maintaining great strength and toughness properties.

440C HRC: 58-60

Originally designed for ball bearings, valves and gears, this high-carbon stainless steel is the staple of the cutlery industry. A high-chromium stainless steel with balanced hardness and corrosion resistance, 440C takes a fine edge and is fairly easy to re-sharpen. An excellent value-priced steel for its performance.

1095 HRC: 55-58

A high carbon steel that has been used for knife blades for over a century. Excellent strength and toughness allow this steel to take a beating that would leave other blades in pieces. Poor corrosion resistance and edge retention means you have to take a little extra care to keep the blade clean and sharp.

D2 HRC: 60-62

A high carbon, high chrome tool steel provides better edge retention than 440C and 154CM, however, it has less toughness and corrosion resistance than either of these alloys. The original "go-to" tool steel for knife blades, D2 provides great edge retention but requires a little extra care to keep the rust off.

M390 HRC: 58-61

A super-performance blade steel with exceptional cutting ability and wear resistance. Given its uniform microstructure, M390 is often used in surgical cutting instruments and other applications that require a high finish. Extremely high carbon and chrome content also give this premium stainless powder-metal alloy the best corrosion resistance of any martensitic stainless alloy.

Damasteel HRC: 58-60

With alternating layers of RWL34 and RPM27, this powder metal 'Damascus' steel doesn't just get by on its looks alone. The interweaving of these two alloys provides great strength and toughness while affording edge retention comparable to that of 440C. Used in special applications due to its high cost and artistic nature.

N680 HRC: 57-59

A special application steel for when corrosion resistance is the primary requirement. Ideal for salt water applications, the addition of nitrogen to the alloy gives this the best corrosion resistance of any blade steel, with edge retention between 420HC and 440C.

154CM HRC: 58-61

A premium grade steel developed for tough industrial applications. Known best for its all-around qualities, 154CM offers a good balance of corrosion resistance, toughness and edge quality.

HEAT TREATMENT

Over the years we have developed a "special recipe" for heat treating our blade steels. This process maximizes the steel's molecular structure for a custom toughness and superior performance. All steels may be created equal, but when it comes to Benchmade, that's where it stops.

COATINGS, HANDLES, LINERS, SHEATHS

COATINGS

CERAKOTE®

A spray-on ceramic coating with excellent wear and corrosion resistance. Used frequently in the firearms industry and available in a wide variety of colors.

DLC

'Diamond-like Carbon,' is a thin layer of carbon atoms that is slowly built up on the surface, providing a sleek black look, a hardness similar to natural diamond and excellent abrasion resistance. DLC is also used as a coating in machining, stamping and molding tools as well as engine components.

ANODIZATION

An electrochemical process used for adding color to titanium surfaces. A combination of chemical bath and electrical voltage level generates the desired color. A similar process is used for aluminum with the addition of a chemical coloring bath.

HANDLES

CARBON FIBER

A contemporary premium composite of thin strands of carbon tightly woven into various weave patterns, then impregnated with resin which is most commonly clear but can be color-tinted. It offers great looks and is exceptionally strong for its minimal weight.

STABILIZED WOOD

A composite material backfilled with resin, stabilized wood is much more resistant to environmental hardships than natural wood.

6AL-4V TITANIUM

Considered an exotic metal alloy (titanium + 6% aluminum + 4% vanadium) with an excellent strength-to-weight ratio that offers exceptional performance in a knife. Titanium is corrosion resistant to natural elements as well as many industrial chemicals.

MICARTA

Layers of linen cloths soaked in resin and compressed together. Most commonly used on more stylish knives due to its rich color and finish qualities.

6061-T6 ALUMINUM

A nonferrous metal originally developed as a premium aircraft-grade aluminum, it offers a solid handle form and function at a nominal weight. Most typically color anodized.

G10

An extremely durable makeup of layers of fiberglass soaked in resin, then highly compressed and baked. Impervious to moisture or liquid and physically stable under a wide range of temperatures. Most commonly black, but is also available in various colors.

GRIVORY®

An amorphous nylon copolymer with exceptional dimensional stability. 50% or greater glass fill.

SANTOPRENE®

A thermoplastic elastomer that is molded to specification. It offers excellent flexibility with high tear strength and fatigue resistance. Resistant to many harsh chemicals. These features contribute to improved performance in a range of tough jobs.

LINERS

6AL-4V TITANIUM

Considered an exotic metal alloy (titanium + 6% aluminum + 4% vanadium) with an excellent strength-to-weight ratio that offers exceptional performance in a knife. Titanium is corrosion resistant to natural elements as well as many industrial chemicals.

410SS STAINLESS STEEL

A common knife grade with low carbon, high chromium content steel that offers excellent bend toughness and wearability. It offers excellent corrosion resistant characteristics as well.

SHEATHS

BALLISTICS NYLON

A heavy-duty woven nylon fabric originally developed for use in bulletproof vests and body armor. Offers great lightweight sheath durability.

LEATHER

A natural material dating back to humans' earliest beginnings in the knife world. It can be easily dyed and tooled for a desired visual effect. Offers traditionally accepted levels of performance and design capability.

KYDEX®

A mixture of acrylic and PVC that offers outstanding impact and chemical resistance as well as fire retardancy. Widely used in the auto and aerospace industries. Molded or thermo-formed.

BOLTARON®

A proprietary, fire retardant PVC/acrylic alloy sheet, black in color, offering a UL Standard 94 V-0 fire rating, excellent impact strength, abrasion resistance, chemical resistance and thermoformability. Manufactured using recycled resin, it is a cost-effective alternative to other general-purpose flame retardant materials.

WARRANTY

LIMITED LIFETIME WARRANTY

Benchmade Knife Company, Inc. ("Benchmade") warrants to the original owner that this knife will be free from defects in materials and workmanship. Benchmade will, without charge, repair or replace, at Benchmade's option, any knife returned for warranty work and found to be defective by Benchmade, according to the terms of this Warranty. If we choose to replace the knife, we may replace it with the same model or one of equal value. The knife must be shipped by owner prepaid and insured freight, together with a description of the problem, and must be accompanied by the original bill of sale, your charge or credit card receipt or any satisfactory proof of the original date of purchase from a retail dealer. Any automatic knife (button or slide activated spring-opening) returned for Warranty service from outside of Oregon must also include a signed Automatic Knife Opening Acknowledgement ("AKOA") form, or be returned through the authorized Benchmade dealer. Any automatic knife sent by you to us without a signed AKOA form will not be returned to you. To obtain an AKOA form, please visit www.benchmade.com. **NO EXCEPTIONS WILL BE MADE.**

"The Benchmade Lifetime Warranty only applies to genuine Benchmade products from authorized Benchmade dealers. Knives purchased on the internet through discount websites, mail order outlets, or through any other unauthorized source, and knives which are determined by Benchmade to be counterfeit are not entitled to our warranty coverage."

WHAT IS COVERED?

This Warranty covers replacement parts and labor.

WHAT IS NOT COVERED?

This Warranty does not cover normal wear; non-factory re-sharpening of the blade; cosmetic damages (such as scratches on the product); damage caused by neglect and/or misuse (meaning use of the knife for any purpose other than its intended purpose as a cutting tool) or the failure to perform normal or necessary maintenance. The Warranty does not cover disassembly or modification of any product by any person other than Benchmade's Warranty department. The Warranty does not cover damage incurred while in shipment; insurance for the product during shipping is recommended and is your responsibility. Do not use your new knife as a screwdriver, pry bar, chisel or punch. Do not throw your knife or use it for any purpose other than cutting. Do not disassemble your knife. Do not sharpen your knife on a power grinding wheel. Any of these acts will void your Warranty. **MINIMUM CHARGE TO REASSEMBLE A KNIFE WHEN THE WARRANTY HAS BEEN VOIDED IS \$20 PLUS PARTS.**

Repair or replacement, as provided under this Warranty, is the exclusive remedy of the consumer. Benchmade shall not be liable for any incidental, reliance, indirect, special, punitive, exemplary, or consequential damages or breach of implied Warranty on this product, including any damage to person or property. Benchmade's liability under any and all circumstances is limited to the purchase price paid by you for the product. Some states do not allow exclusion or limitation of certain types of damages, so the above limitations or exclusions may not apply to you. This Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

This knife has only one use, as a cutting tool. Benchmade knives carry no warranty except as expressly contained herein. Benchmade disclaims all warranties of merchantability and fitness for a particular purpose other than for use as a cutting tool.

Please review the Warranty information and proper knife care instructions provided with each knife.

ORDERING OF AUTOMATIC KNIVES

Automatic knives are available for sale in Oregon. The sale of automatic knives is federally regulated. Always check permissibility within your state or locality as non-federal personnel may be precluded from ownership or use by state laws. **NO EXCEPTIONS WILL BE MADE.** Purchase of automatic knives outside of the state of Oregon must be preceded by the submission of an AKOA form.

The Benchmade AKOA form can be found at:
www.benchmade.com/media/forms/ako_acknowledgment.pdf

SHIPPING OF AUTOMATIC KNIVES

All automatic knives shipped by Benchmade will be sent via courier (UPS, FedEx, etc.) and CANNOT be shipped

through the U.S. Postal Service. Also, please note that all returns of automatic knives must be shipped via courier (UPS, FedEx, etc.). It is our policy that all automatic knives shipped out of state require a signed AKOA form. We will not ship automatic knives out of state until we receive a signed AKOA form.

ARE BENCHMADE ASSIST-OPEN KNIVES LEGAL?

Because of the way the Benchmade assist-open knives are designed and built, they are not considered automatic or switchblade knives under federal interpretations.

Even though the Benchmade assist-open models are not classified as automatics or switchblades, it is still recommended that the user research and verify the legalities in their own specific areas.

COMPLIANCE WITH LAWS, ASSUMPTION OF RISK, RELEASE OF LIABILITY, INDEMNITY

The purchase, use, and ownership of knives is subject to a wide variety of federal, state, and local laws and regulations. Knife laws and regulations are subject to local interpretations and may change frequently. It is the responsibility of the buyer to be aware of and to comply with the laws that govern the buyer in the buyer's specific area, pertaining to owning, carrying, transporting, shipping, and using the product.

We encourage responsible ownership.

THE KNIFE IS VERY SHARP. USE WITH CARE. BE SMART AND SAFE. KEEP OUT OF REACH OF CHILDREN. MISUSE OF THE PRODUCT OR FAILURE TO PROPERLY MAINTAIN YOUR PRODUCT CAN CAUSE MECHANISMS IN THE PRODUCT TO NOT FUNCTION PROPERLY AND COULD CAUSE DAMAGE TO THE PRODUCT AND/OR SERIOUS INJURY OR EVEN DEATH.

You expressly release Benchmade from, and you expressly agree to indemnify and hold harmless Benchmade for, all claims, damages, liabilities, losses, and expenses (including reasonable attorneys' fees) resulting directly or indirectly from your purchase, ownership, transportation, shipment, use, or misuse of your product in violation of any federal, state, or local law, rule, or regulation. Except for the express product Warranty provided herein, Benchmade will not be held responsible or liable for your purchase, ownership, transportation, shipment, use, or misuse of any Benchmade product purchased, either directly from Benchmade or from any retail dealer.

PRICING

Every effort is made to ensure the accuracy of the prices and information presented in this catalog. However, we reserve the right to rectify any and all errors prior to any sale transactions. Prices shown are at suggested retail (U.S. currency). Actual purchase prices may vary. All pricing and product specifications are subject to possible change without prior notice. Visit www.benchmade.com for the latest information.
