

HOW TO CHOOSE YOUR **BENCHMADE KNIFE**

0 ACTIVITY

Outdoor, tactical, every day use-there are many uses for a knife, and some knives are better for certain activities than others.

HOW WILL YOU USE YOUR KNIFE?

TACTICAL Designed for hard, immediate use, these high-strength knives feature robust mechanisms for situations where performance is a must.

RESCUE For critical situations. Gloved hands and the need to cut pliable materials are considerations in the design of these knives.

EVERY DAY Not obtrusive or uncomfortable in slacks or shorts: just convenient and well fitted to your general needs.

OUTDOOR From water to woods, backpacking trips to car camping kayaking to fly-fishing, these versatile cutting tools can be used for many tasks.

HUNTING Knives are a critical component of a successful hunt. These are the most advanced hunting knives ever made.

SURVIVAL Things can happen unexpectedly for any adventurer. These knives have been built for the unexpected.

@ MECHANISM

We offer five primary actions: manual-opening, assisted-opening, automaticopening, fixed blade and Bali-Song®. If you're a mountain climber, you may want an assist. If you're a sportsman, a fixed blade may be the right choice. Whatever the case, consider which mechanism type is optimal for your needs. Mechanisms like the AXIS[®] lock deliver manual opening, assisted opening and automatic opening. Others, like the monolock, deliver only manual opening. For detailed information on our mechanisms, visit page 91.

ACTIONS

Manual-opening "Manuals" must be opened 100%, from the closed position to the open position, by the user.

Assisted-opening "Assists" have a spring that encourages the blade into the open position once the user pushes the blade manually beyond a certain point.

Automatic-opening "Autos" have a button or other actuation switch that **KEY KNIFE FEATURES**

AXIS® The AXIS® lock is truly ambidextrous and extremely strong.

Option Lock When versatility is key, the patent-pending OPTION™ lock gives the advantage of having two different blades using the same mechanism, without compromising lockup strength or ease of use.

Ambidextrous Can be used equally well with either hand.

Reversible Clip The pocket clip can be removed and placed in alternate locations on the handle.

MOLLE[®] Compatible A versatile attachment system designed for kitting military equipment.

LifeSharp: Service and Warranty Our industry-leading lifetime warranty and product service program. For more detailed information, visit pages 89 and 96.

mechanically fires the blade open without the user directly manipulating the blade.

Fixed Blade These knives are permanently open and almost always come with a sheath to protect the edge.

Bali-Song[®] "Balis" or "butterfly knives" open and close by way of two handles that rotate around the front and back of the blade

OBLADE STYLE

While the cutting edge does the work, the edge is applied to the cutting surface in different ways depending on the shape of the blade. Blade shapes with larger radiuses may be optimal for hunting, while blade shapes with hard angles, like the tanto, may be better for tactical applications.

SHAPES

Clip-point Blade contains a sharp beak, typically forward of the mid-point, as if the tip has been "clipped off."

Drop-point Drops off the spine to the top. Tip height is typically below the center line on the blade.

Tanto This shape is easily identified by the angular lines. The knife edge is flat and transitions with a hard break in the angle from the tip to the primary edge.

Reverse Tanto Defined by the bevel creating an upside-down tanto profile, adding weight forward on the blade.

Sheepsfoot The spine of the blade "rolls" into the tip, creating a more rounded end to discourage puncturing.

Wharncliffe Similar in shape to the sheepsfoot with a spine that 'rolls' into the tip earlier. This blade has a completely straight edge.

Spear-point Must be symmetrical considering the blade profile. *Traditionally, spear-points are doublesided, but those knives are more specifically referred to as daggers.

Weehawk Characterized by a sweeping edge and spine radius that tapers to the tip and handle.

CONFIGURATION CODES (INSIDE THE MODEL NUMBERS)

BLADE VARIATIONS

None No coating, no serrations
S Serrations, no coating
BK Black coating, no serrations
SBK Serrations and black coating
DLC Diamond-like-Carbon coating

HANDLE

ORG Orange OD Olive Drab SN Sand PNK Pink YEL Yellow BLU Blue GRY Gray

*-1, -2, etc. typically indicate handle material variations

BLADE STEEL

Steel composition can mean the difference between one sharp cut and a thousand. There are many types of steel, and additional factors that play into the right kind of steel for your usage. For instance, the way some steels are heat-treated plays a critical role in a knife's performance.

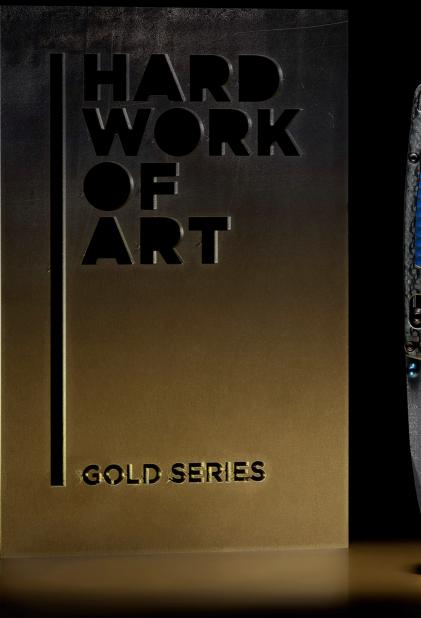

PROPERTIES

Edge Retention How long a blade can maintain its sharpened edge. Strength Maximum stress withstood before a blade breaks or fails. Corrosion Resistance

Resistance of a blade to oxidization and chemical attack.

Toughness Resistance of a blade to fracture and chipping.

For more detailed information, visit page 92 or go to benchmade.com.

The next generation of the ultra strong, ambidextrous AXIS[®] lock. When versatility is key, the patent-pending OPTION[™] lock gives the advantage of having two different blades using the same mechanism; without compromising lockup strength or ease of use.

The Outlast[™] is the first Benchmade[®] to receive the Option lock. A knife designed for rescue personnel, affording purpose-built, functional versatility for the extreme demands of the job.

BENCHMADE DESIGN • U.S.A.

We've combined the strength and versatility of the AXIS® lock with two blades, giving you the flexibility needed to get the job done.

Benchmade Ferro Rod

We've partnered with Exotac, the leader in high-quality fire tools, to create the perfect ferro rod.

STYLE Ferro Rod

MATERIAL Blue anodized 6061-T6 aluminum tinder capsule

STRIKER 5/16" by 3.10" ferrocerium rod

EXTRA Included quickLIGHT™ waterproof tinder

ORIGIN Made in the USA by Exotac

SKU 50023

PRICE \$45

Benchmade Knife Roll

Showcase your collection with our new Knife Roll. Made in the USA and built tough so you can bring your collection with you in the field or just show off to friends.

STYLE Knife Roll

COLOR Gray with black accents

MATERIAL 1680 nylon and urethane coating construction

CAPACITY Holds up to eleven knives and two pens

EXTRA Two integrated loop panels for morale patches SKU 50019 PRICE \$60

Pro-Model Bottle Opener

High-speed beverageentry tool. STYLE Bottle opener COLOR Gray Steel

MATERIAL Stainless steel with wordmark cutout

SKU 1000000

PRICE \$15

Benchmade Pint Glass

For when the time comes to pocket the knife and raise a pint.

STYLE Pint glass

COLOR Clear with blue Benchmade butterfly logo

MATERIAL Glass SKU 988053F

PRICE \$10

Benchmade Coffee Mug

Black on black on black. STYLE Coffee mug

COLOR Matte Black with Gloss Black logo, handle, rim

MATERIAL Ceramic

SKU 989133F

PRICE \$12

SHARPENERS & MAINTENANCE

20° controlled-angle sharpener, perfect for knives, fish hooks, broadheads, and more.

STYLE Field sharpener

ABRASIVES Ceramic, diamond, leather

SERRATIONS Dual ceramic rods fit most sizes

SKU 100604F

PRICE \$40

WORK SHARP KNIFE & TOOL SHARPENERS

Mini-Tactical Pro Sharpener

Easy every day carry with a ceramic honing surface.

STYLE Field sharpener

MATERIAL Ceramitized coating and Duromite® cutters

SKU 983903F

PRICE \$25

Bluelube[™] Lubricant Bluelube[™] Cleanser

Clean, lubricate, and protect your Benchmade.

SKU 983901F - Bluelube™ Cleaner

983900F - Bluelube™ Lubricant

PRICE \$12.50 - Bluelube™ Cleaner (4oz bottle)

> \$10 - Bluelube™ Lubricant (1.25oz bottle w/nozzle)

BENCHUADE

Folding Tool Kit

Keep your Benchmade knife in tune with this 14-piece folding tool kit plus sharpener. Carry case included. SKU 985995F

PRICE \$35

Blue Box Tool Kit

T6, T8, and T10 Torx bits with a bit holder/ extension, all in a molded plastic case that doubles as the handle.

SKU 981084F

PRICE \$20

Tek-Lok[™]

Multiple position options, with compatible sheath. J. 981609F - Tek-Lok", large size.......\$15

MALICE CLIPS®

Injection-molded connecting clip to attach sheaths to MOLLE' systems, or to use as a belt-loop-style carry. Clips securely closed with a snap-lock. K. 983551F - Large MALICE CLIP' (4.75' size).....\$2.50 L. 983550F - Small MALICE CLIP' (3'' size)......\$2.00

DISPLAYS

Magnetic Knife Display Hinged magnetic display; holds up to nine open knives. 13"W × 9"D × 5"H 989797F

Large Display Case Rotatable shelf, multi-drawer, floor display. Three volcano displays that hold 24 knives each. 24"W × 24"D × 72"H 989136F - Tower 100738F - Volcano Display

Single Knife Block Transparent acrylic; each one holds a single knife in the open position. ½"W x 2 ½"D x ¾"H 1000005

Single Knife Holder Transparent acrylic; each one holds a single knife in the open position, with space for information card. 6 ½"W × 2"D × 2"H 100370F

Benchmade Counter Mat Transparent flexible counter mat with Benchmade and LifeSharp logos. 10"x12" 100724F

Waterfall Knife Rack Transparent blue acrylic; holds seven knives in the open position. 10"D x 3 3/4"W x 3"H 985567F

SPECIAL SERVICES

LIFESHARP SERVICE

BENCHMADE® LIFESHARP Service and Warrant We will gladly resharpen your Benchmade knife to a factory razorsharp edge (service does not apply to any serrated portion of the blade). Simply ship your knife to us. We will inspect the knife for

any warrantied repairs and "tune" the knife for optimum performance. Ship the knife to Benchmade, postage-paid and insured. Please enclose your return shipping address. https://www.benchmade.com/lifesharp-service

PERSONALIZED LASER MARKING

Make any Benchmade your Benchmade. Commemorate an event, or outfit the unit. Whatever the occasion, now you can have your logo or artwork laser-etched onto any Benchmade. Depending on the particular model, the mark can be placed on the blade or, for some models, on the handle. If you're interested in this special service, simply call a Benchmade customer service representative at 800.800.7427 or visit https://www.benchmade.com/lasermarking-support

DESIGNER COLLABORATION

Benchmade believes working with custom designers creates the most innovative and functional designs in the industry. These skilled artisans and craftsmen pour their passion into their work and agonize over every detail. By collaborating with a selection of world-class custom designers, we're able to tap into the newest locking mechanisms, modern materials, and custom blending and finishing techniques.

MEL PARDUE The most senior design team member, Mel has been grinding sparks, making knives and creating a following for 25-plus years. His style has a class and simplicity all its own. The Pardue collaborations offer great utility to the every day knife user while at the same time presenting an upscale distinction. Less is definitely more with Mel's designs.

McHenry & Williams

BILL MCHENRY & JASON WILLIAMS

Talented designers and developers of several innovations in the knife-making world including the Benchmade AXIS® mechanism.

WARREN OSBORNE Bridging the gap between custom and production knives, Warren created some of Benchmade's most iconic and loved models like the 940 series, Barrage, Rift and Contego. Warren set very high standards for himself and we are proud that his work has become ingrained in Benchmade's DNA.

SEIICHI NAKAMURA Engineering was his life's work until he retired to focus his efforts on a passion for custom knife work. He specializes in small Japanese-style folders, gentleman's carry and jewelry knives. His eye for artistry and mechanical engineering make him a perfect fit for the innovative Benchmade team.

SIBERT

SHANE SIBERT Since 1994, Shane Sibert's goal has been to design and create unique knives that evoke pride of ownership while at the same time perform tasks and challenges with exceptional ease. A lifelong avid backpacker, Shane draws inspiration from hiking throughout the Pacific Northwest's vast wilderness. He's an occasional practitioner of martial arts and enjoys scuba diving in Oregon's chilly waters.

GREG THOMPSON Greg used an extensive background in mixed martial arts to create the Special Operations Combatives Program (SOCP), a designated program for U.S. Army Special Operations Forces. With over 15 years of experience training Special Operations soldiers, Greg currently works as the Director of Training for the XVIII Airborne Corps at Fort Bragg, NC

BUTCH BALL Butch developed a passion for knives at a very early age. After building a few fixed blades in the early '90s, he decided in 2000 to begin a true custom shop. Butch starts each knife as a prototype, which he then tests, re-creates and tests again. At each stage in this development process, he is thinking of ways to improve the design, whether mechanically or ergonomically. The results of this process are designs that are as robust as they are innovative.

STEVE TARANI A former Central Intelligence Agency (CIA) employee who served the U.S. Defense, Law Enforcement, and Intelligence communities for over 25 years. Specializing in operational readiness, he is a federally certified force options instructor actively contracted by the DOD, NSA, FBI, DHS, and DEA. Tarani is currently a federal contractor, works in executive protection, is a non-ballistic weapons expert, an edged weapons expert witness, and a master knife designer.

PATRICK FAMIN For more than ten years, Patrick Famin has been creating knives. Hailing from France, he now splits his time between France and Florida. While our first collaboration is a folder, prior to teaming with Benchmade, Patrick was inspired by the Benchmade Bali-song® to make balis of his own. His unique designs are a fantastic blend of every day carry function and modern style.

LOCKING MECHANISMS

It seems simple enough: you open the knife, you close the knife. But it's the mechanics of motion that happen in the process of opening and closing that can make the difference between ordinary and extraordinary. Is the knife easy to actuate, can it be opened with one hand, is it ambidextrous, and will it be reliable when you need it most? These are all essential considerations when it comes to knife mechanics.

AXIS[®]

A Benchmade original, AXIS' has been turning heads and winning fans ever since its introduction. A 100 percent ambidextrous design, AXIS' gets its function from a small, hardened steel bar that rides forward and back in a slot machined into both steel liners. The bar extends to both sides of the knife, spans the liners and is positioned over the rear of the blade. It engages a ramped tang portion of the knife blade when it is opened. Two omegastyle springs, one on each liner, give the locking bar its inertia to engage the knife tang. As a result, the tang is wedged solidly between a sizable stop pin and the AXIS' bar itself. Available in manual, AXIS' Assist or Auto AXIS' configurations.

OPTION[™] LOCK

The next generation of the ultra strong, ambidextrous AXIS[®] lock. When versatility is key, the patent-pending OPTION[™] lock gives the advantage of having two different blades using the same mechanism; without compromising lockup strength or ease of use.

AXIS[®] ASSIST

Easily opened, quickly and with one hand, this evolution of the AXIS[°] includes a spring that helps fire the blade into the open position once the user pushes it beyond a certain point manually. The AXIS[°] lock also has the added benefit of "suck-back," which encourages the blade to stay in the closed position. AXIS[°] Assist knives also feature integrated safety lock systems.

LINER LOCK

The basic principle is an integral locking bar, resulting from the knife liner being stress-bent, enabling it to spring into position behind the rear tang of the blade when the blade is opened. The locking bar wedges against the rear of the blade, locking it open until you physically push it clear and close the blade (locking-liners are made either right- or left-hand-specific). And with a modified locking-liner you get a patented feature that helps enhance the lock function. The function success and function failure of a locking-liner depends greatly on how well it is made, and also the quality of the materials used. With Benchmade, you get the best of both.

MONOLOCK

The monolock mechanism is basically a locking-liner on steroids. The knife liner is one and the same as the knife handle, and thus the handle is designed and made to function as the locking mechanism. Subsequently, a thicker material is used to provide enough surface area to be a functional handle and in turn creates a larger surface area to lock the blade with. If executed properly, the monolock design rates very highly in strength and function.

SLIP-JOINT

A back spring-tension hold method found on traditional pocket knives. The spring consists of a piece of steel fixed to the handle. When the blade is rotated, the spring applies varying pressure onto the back of the blade using a camming action. This is not a true locking device because folding the knife requires only that the user overcome the spring pressure in order to rotate the blade back into the handle.

BALI-SONG[®]

As much an art form as it is the ultimate example of form following function. The Bali-Song^{*}, or butterfly knife, is of Filipino ancestry, dating back to nearly AD 800. Its basic form consists of a pin-hinged, two-piece that which, when closed, encases the blade for carry. Opening and closing can be accomplished with a single hand, making the tool that much more utility-capable.

NITROUS[®]

Another patented Benchmade exclusive, the Nitrous' boosts the blade with ease. As the blade is closed, the two torsion arms that run the length of the handle liners are secured in place and make contact with the blade tang. When opening, the user rotates the blade open to a 30-degree angle, where the torsion arms take over and continue the blade-opening process on their own. The huge advantage of the Nitrous' design over other similar concepts is that the blade must be rotated open to beyond a 30-degree angle, which offers added user control.

AUTOMATICS

Sometimes restricted to Active-Duty Military, Law Enforcement and Public Safety, these automatic knives utilize either pushbutton, slide-release or dual-action mechanisms. Benchmade autos take full advantage of powerful springs coupled with our precisely machined lock mechanisms, providing the most reliable automatic systems available in the industry. Our patented integrated safety mechanism, located on the handle spine in all push-button automatics, can also ensures that the blade will not inadvertently deploy, or close once it is locked open.

AXIS[®] AUTOMATIC

Auto AXIS[®] — strong, reliable, fast and an AXIS[®] lock through and through—this locking mechanism fires the blade open 100% mechanically when the AXIS[®] bar is pulled downward. Auto AXIS[®] also features integrated safety mechanisms and the added safety of "suck-back."

PUSH-BUTTON AUTOMATIC

Push the button and the blade fires into the open position. Our push-button mechanisms are not only fast and convenient, they're also extremely strong. Most also feature integrated safety mechanisms.

OUT-THE-FRONT (OTF) AUTOMATIC

Our OTF mechanisms are mechanical masterpieces. Slide the lock button towards the top and the blade fires straight out. Pull the button back to the bottom and the blade returns into the handle.

BLADE STEELS

Benchmade uses a variety of modern materials selected for their superior performance characteristics. We strongly believe that if you're going to put this much effort into designing a premium quality performance cutting tool, then it only makes sense to build it with premium-materials.

KFY

- E Edge Retention
- Strength
- C Corrosion Resistance
- Toughness

STEELS CPM-S30V HRC: 58-60

A premium steel created especially for knives, it is a powder steel creating uniform carbide distribution and clean steel properties. As a blade material it offers excellent corrosion resistance and superb edge gualities. This stainless steels is extremely well balanced, making it one of the best allaround choices for daily tasks.

CPM-S90V HRC: 59-61

A true super-steel, S90V offers substantial improvements in corrosion resistance over 440C and wear resistance far beyond that of D2. Extremely high carbon and vanadium content gives this premium stainless powder-metal alloy the ultimate in edge retention while maintaining great strength and toughness properties.

E S .C. T HRC: 60-62 D2

A high-carbon, high-chrome tool steel provides better edge retention than 440C and 154CM; however, it has less toughness and corrosion resistance than either of these alloys. The original "go-to" tool steel for knife blades, D2 provides great edge retention but requires a little extra care to keep the rust off.

A special-application steel for when corrosion resistance is the primary requirement. Ideal for salt water applications, the addition of nitrogen to the alloy gives this the best corrosion resistance of any blade steel, with edge retention between 420HC and 440C.

HRC: 67-64 CPM-M4

A powder-metal, non-stainless. special purpose high-speed steel with a combination of high carbon, moly, vanadium and tungsten for excellent wear resistance and toughness. Due to its lower level of chrome content it may require additional care to avoid corrosion.

Е С Т 440C

How long a blade can maintain its sharpened edge

Resistance of a blade to fracture and chipping

Maximum stress withstood before a blade breaks or fails

Resistance of a blade to oxidization and chemical attack

Originally designed for ball bearings, valves and gears, this high-carbon stainless steel is the staple of the cutlery industry. A high-chromium stainless steel with balanced hardness and corrosion resistance, 440C takes a fine edge and is fairly easy to re-sharpen. An excellent value-priced steel for its performance

MZQO HRC: 58-61

A super-performance blade steel with exceptional cutting ability and wear resistance. Given its uniform microstructure, M390 is often used in surgical cutting instruments and other applications that require a high finish. Extremely high carbon and chrome content also gives this premium stainless powder-metal alloy the best corrosion resistance

of any martensitic stainless alloy.

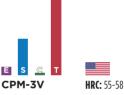

A premium-grade steel developed for tough industrial applications. Known best for its all-around qualities. 154CM offers a good balance of corrosion resistance, toughness and edge guality.

CDM-20CV

Excellent edge retention and great corrosion resistance are typically hard to find in one steel: however, they meet here in CPM-20CV. A powdermetal steel that takes a fine edge and maintains it, 20CV is a great choice for someone looking for low maintenance and superior cutting performance.

A powder-metal tool steel, its high carbon and vanadium paired with low chromium make it exceptionally tough while still being able to maintain a good cutting edge. It may require extra care to keep the rust off, but can handle just about anything thrown at without breaking or edge chipping.

HRC: 58-60

With alternating layers of RWL34 and RPMC27, this powder metal 'Damascus' steel doesn't just get by on its looks alone. The interweaving of these two alloys provides great strength and toughness while affording edge retention comparable to that of 440C. Used in special applications due to its high cost and artistic nature.

HEAT TREATMENT

Over the years we have developed a "special recipe" for heat-treating our blade steels. This process maximizes the steel's molecular structure for a custom toughness and superior performance. All steels may be created equal, but when it comes to Benchmade, that's where it stops.

COATINGS, LINERS, SHEATHS, HANDLES

COATINGS

CERAKOTE*

A spray-on ceramic coating with excellent wear and corrosion resistance. Used frequently in the firearms industry, and available in a wide variety of colors.

DLC

'Diamond-like Carbon,' is a thin layer of carbon atoms that is slowly built up on the surface, providing a sleek black look, a hardness similar to natural diamond, and excellent abrasion resistance. DLC is also used as a coating in machining, stamping and molding tools, as well as engine components.

PVD

PVD, or Physical Vapor Deposition, is a process used to apply super-hard coatings like DLC and chromium nitride. Done in an ultra-high vacuum, the result is a thin but dense layer with far fewer atomic defects than what other processes are capable of, and which gives superb scratch resistance that is ideal for everyday applications.

ANODIZATION

An electrochemical process used for adding color to titanium surfaces. A combination of chemical bath and electrical voltage level generates the desired color. A similar process is used for aluminum, with the addition of a chemical coloring bath.

LINERS

6AL-4V TITANIUM

Considered an exotic metal alloy (titanium + 6% aluminum + 4% vanadium) with an excellent strength-to-weight ratio that offers exceptional performance in a knife. Titanium is corrosion-resistant to natural elements as well as many industrial chemicals.

410SS STAINLESS STEEL

A common knife grade with low-carbon, high-chromium-content steel that offers excellent bend toughness and wearability. It offers excellent corrosion resistant characteristics as well.

SHEATHS

BALLISTICS NYLON

A heavy-duty woven nylon fabric originally developed for use in bulletproof vests and body armor. Offers great lightweight sheath durability.

LEATHER

A natural material dating back to humans' earliest beginnings in the knife world. It can be easily dyed and tooled for a desired visual effect. Offers traditionally accepted levels of performance and design capability.

KYDEX*

A mixture of acrylic and PVC that offers outstanding impact and chemical resistance as well as fire retardancy. Widely used in the auto and aerospace industries. Molded or thermo-formed.

BOLTARON*

A proprietary, fire-retardant PVC/acrylic alloy sheet, black in color, offering a UL Standard 94 V-0 fire rating, excellent impact strength, abrasion resistance, chemical resistance and thermoformability. Manufactured using recycled resin, it is a cost-effective alternative to other general-purpose flame-retardant materials.

HANDLES

CARBON FIBER

A contemporary premium composite of thin strands of carbon tightly woven into various weave patterns, then impregnated with resin that is most commonly clear but can be color-tinted. It offers great looks and is exceptionally strong for its minimal weight.

STABILIZED WOOD

A composite material backfilled with resin, stabilized wood is much more resistant to environmental hardships than natural wood.

6AL-4V TITANIUM

Considered an exotic metal alloy (titanium + 6% aluminum + 4% vanadium) with an excellent strength-to-weight ratio that offers exceptional performance in a knife. Titanium is corrosion-resistant to natural elements as well as many industrial chemicals.

MICARTA

Layers of linen cloths soaked in resin and compressed together. Most commonly used on more stylish knives due to its rich color and finish qualities.

6061-T6 ALUMINUM

A nonferrous metal originally developed as a premium aircraftgrade aluminum, it offers a solid handle form and function at a nominal weight. Most typically color-anodized.

G10

An extremely durable makeup of layers of fiberglass soaked in resin, then highly compressed and baked. Impervious to moisture or liquid and physically stable under a wide range of temperatures. Most commonly black, but is also available in various colors.

GRIVORY*

An amorphous nylon copolymer with exceptional dimensional stability. 50% or greater glass fill.

SANTOPRENE*

A thermoplastic elastomer that is molded to specification. It offers excellent flexibility with high tear strength and fatigue resistance. Resistant to many harsh chemicals. These features contribute to improved performance in a range of tough jobs.

The following are registered trademarks of their respective companies: Zytel^{*}, E.I. du Pont de Nemours & Company; Kydex^{*}, Kleerdex Company; Noryl GTX^{*} and Valox^{*}, General Electric Company; Santoprene^{*}, Advanced Elastomer Systems; Grivory^{*}, EMS-Grivory; Boltaron^{*}, Boltaron Performance Products, LLC.

WARRANTY

LIMITED LIFETIME WARRANTY

Benchmade Knife Company, Inc. ("Benchmade") warrants to the original owner that this knife will be free from defects in materials and workmanship. Benchmade will, without charge, repair or replace, at Benchmade's option, any knife returned for warranty work and found to be defective by Benchmade, according to the terms of this Warranty. If we choose to replace the knife, we may replace it with the same model or one of equal value. The knife must be shipped by owner prepaid and insured freight, together with a description of the problem, and must be accompanied by the original bill of sale, your charge or credit card receipt or any satisfactory proof of the original date of purchase from a retail dealer. Any automatic knife (button or slide activated spring-opening) returned for Warranty service from outside of Oregon must also include a signed Automatic Knife Opening Acknowledgement ("AKOA") form, or be returned through the authorized Benchmade dealer. Any automatic knife sent by you to us without a signed AKOA form will be returned via an authorized Benchmade dealer. To obtain an AKOA form, please visit www.benchmade.com. NO EXCEPTIONS WILL BE MADE.

"The Benchmade Lifetime Warranty only applies to genuine Benchmade products from authorized Benchmade dealers. Knives purchased on the internet through discount websites, mail order outlets, or through any other unauthorized source, and knives which are determined by Benchmade to be counterfeit are not entitled to our warranty coverage."

WHAT IS COVERED?

This Warranty covers replacement parts and labor.

WHAT IS NOT COVERED?

This Warranty does not cover normal wear; non-factory re-sharpening of the blade; cosmetic damages (such as scratches on the product); damage caused by neglect and/or misuse (meaning use of the knife for any purpose other than its intended purpose as a cutting tool) or the failure to perform normal or necessary maintenance. The Warranty does not cover disassembly or modification of any product by any person other than Benchmade's Warranty department. The Warranty does not cover damage incurred while in shipment; insurance for the product during shipping is recommended and is your responsibility. Do not use your new knife as a screwdriver, pry bar, chisel or punch. Do not throw your knife or use it for any purpose other than cutting. Do not disassemble your knife. Do not sharpen your knife on a power grinding wheel. Any of these acts will void your Warranty. MINIMUM CHARGE TO REASSEMBLE A KNIFE WHEN THE WARRANTY HAS BEEN VOIDED IS \$20 PLUS PARTS.

Repair or replacement, as provided under this Warranty, is the exclusive remedy of the consumer. Benchmade shall not be liable for any incidental, reliance, indirect, special, punitive, exemplary, or consequential damages or breach of implied Warranty on this product, including any damage to person or property. Benchmade's liability under any and all circumstances is limited to the purchase price paid by you for the product. Some states do not allow exclusion or limitation of certain types of damages, so the above limitations or exclusions may not apply to you. This Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

This knife has only one use, as a cutting tool. Benchmade knives carry no warranty except as expressly contained herein. Benchmade disclaims all warranties of merchantability and fitness for a particular purpose other than for use as a cutting tool.

Please review the Warranty information and proper knife care instructions provided with each knife.

ORDERING OF AUTOMATIC KNIVES

Automatic knives are available for sale in Oregon. The sale of automatic knives is federally regulated. Always check permissibility within your state or locality as non-federal personnel may be precluded from ownership or use by state laws. NO EXCEPTIONS WILL BE MADE. Purchase of automatic knives outside of the state of Oregon must be preceded by the submission of an AKOA form.

The Benchmade AKOA form can be found at:

www.benchmade.com/media/forms/ako_acknowledgment.pdf

SHIPPING OF AUTOMATIC KNIVES

All automatic knives shipped by Benchmade will be sent via courier (UPS, FedEx, etc.) and CANNOT be shipped through the U.S. Postal Service. Also, please note that all returns of

automatic knives must be shipped via courier (UPS, FedEx, etc.). It is our policy that all automatic knives shipped out of state require a signed AKOA form. We will not ship automatic knives out of state until we receive a signed AKOA form.

ARE BENCHMADE ASSIST-OPEN KNIVES LEGAL?

Because of the way the Benchmade assist-open knives are designed and built, they are not considered automatic or switchblade knives under federal interpretations.

Even though the Benchmade assist-open models are not classified as automatics or switchblades, it is still recommended that the user research and verify the legalities in their own specific areas.

COMPLIANCE WITH LAWS, ASSUMPTION OF RISK, RELEASE OF LIABILITY, INDEMNITY

The purchase, use, and ownership of knives is subject to a wide variety of federal, state, and local laws and regulations. Knife laws and regulations are subject to local interpretations and may change frequently. It is the responsibility of the buyer to be aware of and to comply with the laws that govern the buyer in the buyer's specific area, pertaining to owning, carrying, transporting, shipping, and using the product.

We encourage responsible ownership.

THE KNIFE IS VERY SHARP. USE WITH CARE. BE SMART AND SAFE. KEEP OUT OF REACH OF CHILDREN. MISUSE OF THE PRODUCT OF FAILURE TO PROPERLY MAINTAIN YOUR PRODUCT CAN CAUSE MECHANISMS IN THE PRODUCT TO NOT FUNCTION PROPERLY AND COULD CAUSE DAMAGE TO THE PRODUCT AND/OR SERIOUS INJURY OR EVEN DEATH.

You expressly release Benchmade from, and you expressly agree to indemnify and hold harmless Benchmade for, all claims, damages, liabilities, losses, and expenses (including reasonable attorneys' fees) resulting directly or indirectly from your purchase, ownership, transportation, shipment, use, or misuse of your product in violation of any federal, state, or local law, rule, or regulation. Except for the express product Warranty provided herein, Benchmade will not be held responsible or liable for your purchase, ownership, transportation, shipment, use, or misuse of any Benchmade product purchased, either directly from Benchmade or from any retail dealer.

PRICING

Every effort is made to ensure the accuracy of the prices and information presented in this catalog. However, we reserve the right to rectify any and all errors prior to any sale transactions. Prices shown are at suggested retail (U.S. currency). Actual purchase prices may vary. All pricing and product specifications are subject to possible change without prior notice.
